SUMMARY

I am a Senior Frontend Engineer with over 9 years of experience in designing and building scalable web applications using React and TypeScript. I have a proven history of delivering impactful MVPs and AI-driven tools, contributing significantly to the business growth of high-profile companies. My passion for performance optimization and collaborative development drives me to create products that enhance user satisfaction and deliver measurable results

EXPERIENCE

Software Engineer

Baggage Media (Baggage Group)

08/2024 Remote

Remote software engineering focused on React-based solutions

- Partnered directly with CXOs to scope and deliver an MVP browser extension for airport baggage operations, enabling streamlined data entry into external systems and improving traceability and workflow efficiency across operational teams
- Leading phase-2 development of an orchestration dashboard for baggage handling workflows, including analytics-driven monitoring, real-time operational tooling, and role-based access control for enterprise users

Senior Software Engineer

o9 Solutions

07/2019 - 08/2024 Bengaluru, KA

A leading provider of AI-powered supply chain solutions

- Contributed to o9's scale-up journey from pre-unicorn to \$3.7B valuation by delivering critical UI features, performance improvements, and platform enhancements across multiple product verticals
- Engineered filter state persistence and client-side caching layer, resulting in a 20% increase in workflow efficiency and significantly reducing redundant server calls
- Led end-to-end development of NLP-based search and action workflows; implemented a secure multi-party collaboration feature supporting \$8M ACV enterprise accounts
- Built Pie and Gauge chart widgets and a live data presentation feature that reduced collaboration overhead and saved users 30% of time previously spent in manual sync meetings
- Delivered a full platform redesign including dark mode, multi-font support, and customizable landing page – improving accessibility (a11y) compliance and user satisfaction scores
- Conducted regular code reviews, contributed to frontend architecture decisions, and mentored junior engineers on React best practices and TypeScript patterns

Associate L2 – Front End

Publicis Sapient

10/2016 - 07/2019 Bengaluru, KA

A global consulting firm that specializes in digital transformation

- Built and maintained a reusable component library (Accordion, Hero Banner, Store Locator, Header/Footer) deployed across 3 enterprise clients - Nissan, LCBO, and Rogers – reducing per-project UI setup time and standardizing design system adoption
- Resolved critical bugs on Nissan's car configurator platform, improving cross-browser compatibility and reducing reported UI defects across major browsers
- Speaker at Sapient XT Summit 2017 on AMP and Progressive Web Apps (PWA), demonstrating early expertise in web performance and emerging browser standards

EDUCATION

Bachelor of Engineering

PES Institute of Technology

09/2012 - 06/2016 Bengaluru, KA

KEY ACHIEVEMENTS

o9 Solutions Recognition

Achieved o9 Solutions' recognition as Performer of the Quarter (Oct 2023) and Performer of the Month (Jul 2021), showcasing my impactful contributions to high-stakes projects

Speaker at Industry Conference

Delivered keynote on AMP and Progressive Web Apps at Sapient XT Summit 2017, highlighting my leadership in web performance

Tech Blogger

Created a tech blog that garnered over 20,000 readers and 2,000 subscribers, demonstrating my passion for sharing knowledge and advancements in frontend development

SKILLS

HTML	CSS	TypeScript	REST
RTL	React	Webpack	Redux
Jest	Cypress	JavaScript	SCSS
NLP	Angular	Caching	PWA
Next.js	Node.js	Tailwind	Chart.js
ES6+	jQuery	GraphQL	E2E
Babel	Docker	Figma	Vercel
AWS	Azure	GCP	Git
Linux	Scrum	Code Review	Agile

PROJECTS

BailOutt.com

10/2025

A smart service that provides users a way to receive fake calls/reminders

- Developed an AI-powered fake call and reminder service that allows users to escape awkward situations instantly
- Built end-to-end scheduling workflows, using real-number call delivery via telephony APIs and Supabase-backed authentication
- Achieved 100+ early user signups with strong organic traction for the platform

Kitaaben.com

11/2025

A Privacy-first book tracking PWA with AI review assistance and cloud-synced reading progress: built and shipped end-to-end as a solo founder.

- Built full-stack React PWA: book cataloguing, page-level progress tracking, offline support, and AI review co-writing.
- Implemented paid Elite tier with Dodo payments, Firestore sync, and a no-algorithm, no-social-feed design philosophy that differentiates from Goodreads-style competitors.
